Involvement in Medical Student Teaching

This practice teaches University of Edinburgh second year medical students on Tuesday and Thursday afternoons throughout University term times. Small groups of five or six students would like to meet patients with the medical problems specified below. If you would like to be involved, you will be asked to come in for around an hour between 2pm and 3pm or 3pm and 4pm. The students will ask you questions about your medical problems and would also like to examine the body system related to that medical problem (for example, if you have asthma they would like to listen to your chest, or if you have had a stroke, they would like to tap on your reflexes).

If you would like to help by participating, please fill in the form below and hand it in to reception. If you are needed, a doctor will call you to explain more about the teaching, check whether you still wish to be involved and arrange a suitable time for you to come in.

Thank you very much for considering getting involved.

Name _____

Date of Birth _____

Best contact number(s) _____ / _____

I have (or have had in the past) the following medical problem(s) – please tick

- Asthma
- Chronic obstructive pulmonary disease (COPD)
- Angina
- Peripheral arterial disease
- Stroke or TIA (mini-stroke)
- Epilepsy
- Inflammatory bowel disease (ulcerative colitis or Crohn's disease)
